

Rich Cremona*President and Chief Executive Officer*

Rich Cremona has an extensive professional background that spans leadership roles in sales, marketing, customer care, technical support, field services, operations, human resources, and international business development throughout the telecommunications industry. A 20-year industry veteran, Rich joined Kentrox as CEO and President; and a member of the Board of Directors. His career has included executive positions with AT&T, Lucent Technologies, Sprint and, most recently, Openwave Systems. As Kentrox continues to innovate and grow its presence in the remote monitoring, management and control of wireless and wireline network infrastructure, the company will rely on Rich's diverse, relevant expertise. His unique industry perspective will guide Kentrox as it strengthens its product and solution offerings and market position while serving the operational needs of telecommunications service providers around the world.

Michael P. Keegan*Executive Vice President and Chief Financial Officer, Kentrox*

Michael P. Keegan brings 20 years of financial experience to Kentrox. He has responsibility for finance, accounting, information technology, and working with the executive team on corporate strategy, capital market activities, and mergers and acquisitions. Prior to joining Kentrox, he served as EVP of The Pizzuti Companies where he oversaw financial management and operations. At Applied Innovation (acquired by Kentrox in 2007), he held roles of EVP, Chief Operating Office, and Chief Financial Officer. As COO, he directed all company functions including sales, engineering, marketing, manufacturing, finance and administration. While CFO, he was responsible for corporate governance and investor relations, financial management and accounting, human resources, information systems, and facilities management. Keegan also worked for Orbital Sciences Corporation where he was VP, Controller responsible for accounting and financial reporting for the publicly held, multi-national aerospace company during a rapid growth period.

John Ryan*Executive Vice President, Sales and Marketing*

To accelerate established momentum with tier one wireline providers and increase market penetration for its growing portfolio of wireless and wireline infrastructure solutions, Kentrox turned to John Ryan, a telecommunications industry veteran with more than 20 years of sales and marketing experience. With more than 15 years spent in sales leadership roles, John is directing an aggressive sales and marketing strategy to bring Kentrox infrastructure solutions to carriers worldwide. John's executive track record includes communicating both the value of products and services as well as corporate value, contributions that greatly assisted in multiple successful IPOs and acquisitions. John joined Kentrox in 2008 after serving three years as vice president of North American sales at Veraz Networks, a provider of voice, video and multimedia products for wireline, broadband and wireless networks worldwide, a company he helped take public in 2007. Prior to Veraz Networks, John held regional vice president roles with both Tekelec and Taqua, had sales and sales management responsibilities with Corvis Corporation, Atmosphere Networks, and Nortel Networks. John began his career in telecommunications at Nortel Networks as a systems engineer, a position he held for nearly six years.

Ben Stump

Executive Vice President and Chief Technology Officer

With more than a decade of telecommunications experience focused in the operations support systems (OSS) market as well as technology, operations and engineering for carriers worldwide, Ben Stump is directing the research, development and engineering of Optima, Kentrox's remote monitoring and management solutions set. Prior to joining Kentrox, Ben was an executive consultant for BCGI, the solutions developer for mobile carriers and mobile virtual network operators, and DAX Technologies, the company from which Kentrox acquired the core technology for Optima. Ben previously served as vice president of technology for Digicel USA, the U.S. division of leading Caribbean carrier Digicel, where he directed the creation of the technology, operations and engineering organizations for the company's foray into the U.S. market. Prior to Digicel, Ben held leadership roles at New Jersey-based Telcordia Technologies, where he drove over 200 percent growth in the IMS OSS solutions portfolio in his first year. He led the development of Telcordia's award-winning service management solution which now holds a market leadership position across three continents and is adopted by the largest global wireless carriers.
